Index

A

ABRAHAM, M., 223, 244, 256
Absorption condition, 190
Addition theorem, of BESSEL and HANKEL functions, 107, 234
—, of the preceding and the standing wave, 146
—, of spherical harmonics, 133
Adjoint differential form, 44
AIRY integrals, 118, 123, 149
D'ALEMBERT'S solution of the wave equation, 41
Alkali atoms, 206
Anharmonic analysis, 27
—, normalization condition of, 293
Antenna, 239
—, horizontal, 243
—, frame, 245, 267
—, magnetic, *see frame*
—, vertical, 242
Approximation at a point of discontinuity, 12
—, oscillating, 17, 26
—, osculating, 17, 26
Associated spherical harmonics, 126
—, with negative index m, 128
—, normalization of, 132
—, recursion formula for, 132
Asymptotic representation, of HANKEL functions, 100, 119
—, of spherical harmonics, 146

B

BALMER term, 200, 204
BAUER, G., 235
BAULE, B., 37
Bending of beams, 303
BESSEL functions, 84
—, generating function, 107
—, with fractional indices, 111
—, integral representation of, 86
—, integral representation of functions in terms of, 109
—, summation over the roots of, 295
Bipole, 151
BOHR, N., 201
Boundary condition, adiabatic, 63
—, of exterior heat conduction, 64
—, homogeneous, inhomogeneous, 82, 177
—, isothermal, 63
Boundary value problems, general, in acoustics and heat conduction, 177, 180
—, exterior, of the wave equation, 214
—, of the first and second kind, 53
—, in the potential equation, 181
DE BROGLIE, L., 207
BUSH and CALDWELL, 4

C

CARATHÉODORY, C., 320
Characteristics, theory of, 36
Charge cloud, 205
CHRISTOFFEL, E. B., 159
Circuit relations for H_n^1 and H_n^2, 293
—, semi, 251, 253
Completeness relation, 5
Confluent hypergeometric function, 154
COUETTE flow, 292
COURANT-HILBERT, 172, 179
Cylinder function, general, 86
Cylinder problems of heat conduction, 101
Cylindrical wave, 100, 108

D

DARWIN, C. G., 129
DEBYE, P., asymptotic representation of the Hankel functions, 119
DEBYE, saddel point method of, 116, 118
Delta function, 3, 27, 58, 72
Diffusion, 33
—, FICK'S law, 34
—, coefficient, 34
Dipole, HERTZ, 151, 236
—, magentic, 268
DIRAC, P. A. M., 27, 183
Direction characteristic of the horizontal antenna, 261
DIRICHLET, discontinuous factor, 290, 299
—, problem of potential theory 130, 186
Dispersion by colloidal particles, 224
Drop lines, 99

E

Earth absorption in radio, 271
Earth's temperature, 68
Eigen-differentials, 211
Eigenfunctions, 166
—, conjugate complex, 186
—, of the hydrogen atom, 204, 225
—, improper and proper, 221
—, regular and singular, 221
Eigen value spectrum, continuous and discontinuous, 188
Eigen values, 166
—, continuous spectrum, 188, 193
—, degenerate case, 167
—, of the hydrogen atom, 204, 225
—, in wave mechanics, 200
Elastic rod, 33, 291
Electrodynamics of variable fields, differential equation of, 32
Elliptic differential equations, 38, 42
EPSTEIN, P., 255
Error, mean square, 2, 22
EULER's constant, 94

F

FABER, G., 99
Fluid friction, 33
FOURIER, J. B., 1, 92, 101
FOURIER analysis, anharmonic, 27, 77
—, analysis of crystals, 20
—, integral, 19, 59
—, representation of coefficients 3
—, transformation, 21
FOURIER series, 1
—, convergence of, 14
FRANK-MISES, 80, 192, 236
FREDHOLM-HILBERT theory of integral equations, 169
Freedom, degrees of, infinite number for oscillating systems, 169
Frequency ω, 20, 84
Function space, 180
Fundamental state of the H atom, 205
Fundamental theorem of the theory of oscillating systems with an infinite number of degrees of freedom, 178

G

GAUSS, C. F., 1, 94, 153, 171
GAUSS, law of error, 59
—, series, 153
GAUSS, theorem of the arithmetic mean in potential theory, 181, 295
GEGENBAUER polynomials, 227, 229
Generating function, of the BESSEL functions of integral index, 107
—, of spherical harmonics, 123
GIBBS, W., 12
GIBBS' phenomenon, 12
GORDON, W., 209
GRATIATOS, J., 289
GREEN's function for self-adjoint differential equations, 49, 61, 198
—, for a continuous spectrum, 193
—, one dimensional, 291
—, in many-dimensional space, 232
—, of the sphere in potential theory, 134
—, as the solution of an integral equation, 183
—, for the wave equation, 182
—, for the wave equation in the exterior of a sphere, 198
—, reciprocity of the, 50, 217
GREEN's theorem, 45
—, for linear heat conduction, 55
—, the second form of, 291

H

HANKEL functions, integral representation of, 88
—, asymptotic representation, 98, 294
—, with fractional index, 113
—, logarithmic singularity of H_0, 294
HANKEL, symbol, 117
Harmonic analyzer, 4
Heat conduction, linear, 35
Heat conductivity, 34
—, ratio of outer and inner, 293
—, ratio with electric conductivity. 293
Heat equation, 34
HEISENBERG, W., 201
HERMITE polynomials, 27, 302
HERTZ, H., 236, 244, 276
HERTZ, concave mirror experiment, 162
—, dipole, 236, 237
—, force line diagrams for the oscillating dipole, 244
—, vector 238
HILBERT, D., 166
HILBERT space, 179, 184
HOBSON, E. W., 129

HÖRSCHELMANN, H. VON, 262
DE L' HOSPITAL'S rule, 93
Hydrogen eigenfunctions, 204, 225
Hydrogen radius, 205
Hyperbolic differential equation, 38, 41
Hypergeometric function, differential equation of the, 152
—, confluent, 154

I

Image, electric, 135
Integral equations, HILBERT'S theory of, 169, 184
—, orthogonality theorem, 188
Integral sine, 11
Integration, complex, 290
Inversion, 136
—, center of, 139
—, sphere of, 139
Ionosphere (KENELLY-HEAVISIDE layer), 236

J

JACOBI, C. G. J., 72

K

KEPLER problem for the H atom, 201
Kernel, resolving, 50
—, symmetric, 184

L

LAGUERRE, differential equation, 204
—, polynomials, 27, 205, 302
LAMÉ, G., 81
LAMÉ wave function, 224
LAPLACE, P. S., 131
LAPLACE operator, 32
LAURENT series, 109
LEGENDRE polynomials, 129
LEIBNIZ series, 12
LIOUVILLE theorem on conformal mapping, 140
LYMAN series, 204

M

MAGNUS-OBERHETTINGER, 235
Many dimensional space, spherical wave and GREEN'S function in, 232
Mapping, conformal through reciprocal radii, 139
MARCONI, G., 262
MATHIEU equation, 168
MAXWELL, J. C., 130, 135, 152, 247
Meander line, 7
Measurement, general electrodynamic system of, 237
Membrane, vibrating, 166
Method of least squares, 22
MIE, G., dispersion by colloidal particles, 224
Misdirection and correct direction in range finding, 267
MONGE, theory of characteristics, 37
MOTT and MASSEY, 209
Multipole, electric, 149
—, see also unipole, bipole, quadrupole, octupole
MURRAY, F. H., 257

N

NAVIER-STOKES equation, 34, 292
NEUMANN, C. and F., 158
NEUMANN function, 90
NEWTONIAN potential, 49, 123
NICHOLSON, J. W., 122
NIESSEN, K. F., 257
Nodal lines of the vibrating membrane, 170, 174
Non-uniform convergence of the approximation process, 12
Normal coordinates, 169
Normalizing condition, 3
Normalization of the eigenfunction in the infinite domain, 210
Numerical distance, 256

O

Octupole, 151
OHM G. S., 179
OHM'S law, 34
OHM-RAYLEIGH principle, 179
Orthogonality condition, 2, 22, 124
Oscillating membrane, 33, 166
—, string, 33
Oscillations, free and forced, 182
OTT, H., 256

P

Parabolic coordinates in the wave mechanical scattering problem, 225
Parabolic differential equations, 38, 43

Partial differential equation of the second order, most general form of a linear, 36
Pass method, 99
Perturbation theory in wave mechanics, 170, 188
Pipe, open and covered, 291
Plane wave, 84
Plate flow, laminar, of an incompressible viscous fluid, 291
POINCARÉ, fundamental theorem of the theory of eigenfunctions, 168
—, domain of validity of asymptotic series, 117
POISSON's equation, 182
—, integral, 138
VAN DER POL, B., 256
VAN DER POL and BREMMER, 113, 224
Potential equation, in hydrodynamics, 32
Potential theory, DIRICHLET problem. 130, 186
—, one dimensional, 291
—, GREEN's function for a sphere, 134
Probability concept in wave mechanics, 201, 205

Q

Quadrupole, 151
Quantum number, azimuthal, radial, principal, magnetic, 202, 203

R

Radiation condition, 189
Radiation energy, 270
Radio on a plane and spherical earth, 236
Rainbow, 224
—, AIRY's theory, 123
Rare gases as eight-shells, 206
RAYLEIGH, theory of sound, 179
Reciprocal radii, 135
Reciprocity law, 50, 184
Reflection of the plane wave on the sphere, 224
Relativity, special theory of, its differential equation, 32
RELLICH, F., 192
RENNER, F., 275, 277
Resonance catastrophe, 187
RIEMANN, B., 109
RIEMANN's two-sheeted space, 80
integration of the hyperbolic differential equation, 52
problem of sound waves, 164
Ring problem in heat conduction, 71
RUTHERFORD's model of the H atom, 200, 210
—, formula of nuclear physics, 206
RYDBERG constant, 201, 204

S

Saddle point method, 98
—, according to DEBYE, 116, 118
SAUTER, F., 192, 215
Scattering, wave mechanical, 206
SCHLÄFLI, 88
SCHMIDT, E., 184
SCHÖNFLIES, A., 81
SCHRÖDINGER, E., 166
SCHRÖDINGER, equation 35, 200
Self-adjointness, condition of, 45
Semi-convergent, 116
Series expansions in linear differential equations, 92
SOMMERFELD, A., 57, 80, 88, 221, 235
SOMMERFELD, A., and RENNER, F., 277
Spherical geometry, 140
Spherical harmonics, 123
—, addition theorem of, 133, 146
—, asymptotic representation of, 146
—, development by, 21
—, difference equation, 124
—, differential equation of, 123
—, generating function of, 123
—, integral representation of, 130
—, LAPLACE integral of, 131
—, of non-integral index, 155
—, orthogonality and normalization condition, 124
—, as special case of the hypergeometric differential equation, 153
—, of the second kind, 157
—, their singularity, 157
—, generating function, 158
—, integral representation, 158
—, zonal, 127, 131
Spherical wave, 109, 143
STEFAN-BOLTZMANN law, 64
s-term, 206
Surface spherical harmonics, 130
—, sectorial 152
—, tesseral, 152
Surface wave, 254

T

TAYLOR series, 27, 109
TCHEBYCHEFF, P. L., 2
Temperature conductivity, 34
Theta function, elliptic, 72
—, transformation formula, 74
THOMAS, L. H., 257
THOMPSON, J. J., 223
THOMSON, W., method of reciprocal radii, 136, 141
THOMSON and TAIT, classification of spherical harmonics, 127
Tone color, basic tone, overtones, 179
Transmitter, electric and magnetic, 245
—, tube 237
Transversal vibrations in a thin plate, differential equation of, 33

U

Ultra-sound and Infra-sound, 164
Unipole, 151
Uniqueness of solution of arbitrary heat conduction problems, 82
Unit of source, definition of, 47

V

Viscosity, kinematic, 34

W

WATSON, G. N., 88, 113, 119, 221, 282
Wave equation in acoustics and optics, 32
Wave mechanics, eigen value spectrum, 200
Wave bundle, 211
WEBER, H., 109
Weight, distribution of, in an approximation process, 26
WEYL, H., 166, 211
WHIPPLE, 289
WHITTAKER integral, 221
WIEDEMANN-FRANZ law, 293, 311
WIRTINGER, W., 122

Y

YUKAWA meson equation, 307

Z

ZENNECK waves, 255
—, pattern of electrical lines of force, 296, 326

0
1
H 2
I 3
J 4
